

## The Month Ahead – April 2022

March proved to be somewhat of a comeback month for several equity markets, with indices in the US on track to end the month with solid gains, erasing some of the early 2022 losses. As we near the end of the month, the S&P 500 and NASDAQ 100 are both up about 5% for the month. European equities are also on track to claw back some losses, but gains are more limited as the ongoing geopolitical issues mean the outlook is a little murkier.
